

Open Summit AI New York 2027

Canonical: <https://opensummit.ai/new-york>

Details:

Thursday 18 February 2027 · The Town Hall, New York · Tickets available

We're bringing our business-focused AI conversation to The Town Hall in New York. Our announced line-up spans AI products and ecosystems, enterprise analytics, robotics, human perception, business discovery and operating experience.

We bring together founders, owners, operators and senior decision-makers who want to examine AI in the context of real organisations. The one-stage format creates a shared programme and a basis for discussion with other people making similar decisions.

View New York tickets . Programme and ticket details are current as of 22 September 2026.

Date, venue and programme status

Join us on 18 February 2027 at The Town Hall . Tickets are available now. We'll announce our full programme, doors time, session times and overall runtime as the event approaches.

We're developing a dedicated New York run sheet. We'll confirm local timings separately from our Australian programmes, so check our New York booking updates when planning your arrival, departure and additional activities.

Expect talks and practical conversations about AI in business. You do not need a technical background to take part. The aim is to connect the technology with the decisions businesses face about operations, customers, investment and implementation.

Announced New York speakers

David Hoang works on AI and ecosystem at Atlassian. He joins our New York panel, bringing a product and ecosystem perspective to the conversation.

Bill Roberts , Managing Director at Deloitte Consulting LLP, specialises in data science, algorithms and advanced analytics. He has more than 20 years of experience applying machine learning and stochastic modelling to problems across industry, government and academia, including applying analytics at scale.

Thomas Hughes is Principal Hardware Development Engineer at Amazon Robotics. His named role adds a hardware and robotics perspective to the announced New York line-up.

Dr Khizer Khaderi is Founder and Director of Stanford's Human Perception Lab and a Stanford HAI faculty affiliate. His work spans AI, spatial computing and human performance, connecting technical capability with human experience.

Jack Bear , Founder of Norg AI, works on the infrastructure that helps businesses appear in AI search and generated answers. His focus connects customer discovery with the information agents use.

Clayton Cross , CEO and Founder of Ellipsis Mining, brings experience as an investor, adviser and operator across technology, venture capital and emerging industries. His earlier Open Summit material examines the systems and economics surrounding AI deployment.

Cat Casey , Founder and CEO of The TechnoCat, joins our New York line-up. We'll share further speakers and sessions as our programme develops.

These speakers are announced for New York. Our 2026 speaker history celebrates a separate set of past appearances.

Choose a New York ticket

Our New York tickets are priced in US dollars :

Ticket	Displayed price	Main distinction
Regular	USD459 per ticket	Core keynotes and panels; standard theatre seating
Team	USD459 per person	Groups of five or more
Premium	USD719 per ticket	Preferred seating
Premium Team	USD719 per person	Preferred seating for groups of five or more
VIP	USD1,429 per ticket	Front rows and VIP/speaker drinks, according to the selected package

The Regular listing includes networking before and after and an event pack before the day. Review the current ticket selector for full tier inclusions, availability and the checkout total. Australian GST wording, group discounts and guest promotions should not be carried over to a New York booking.

Global awards in New York

We're bringing the global final of our Open Summit AI Awards to New York on 18 February 2027 . The awards recognise frontier labs, measurable business impact, organisational transformation and AI running in production with real users.

Global entries close on 1 February 2027 . Our awards take national winners through regional finals towards the global final. Our scoring gives five points to the room and five to the judging panel.

For a submission, start with the work and its evidence: what was built, what changed and how the result can be supported. Our awards page explains how you can enter or nominate. The New York programme will provide event-specific timing and access details.

Explore our series before you attend

We held our Australian events at Melbourne Town Hall in May 2026 and Sydney Town Hall in July 2026. Our Sydney highlights film takes you inside that earlier event, while our speaker deck library provides examples of the content.

Clayton Cross's presentation covers AI operating advantage, model economics and routing different tasks to appropriate models. John McGiffin's examines enterprise maturity, the cost curve and why pilots stall before production. Jack Bear's considers business discovery when agents do the searching. Those materials illustrate our series' practical focus without prescribing the New York sessions.

Planning your New York visit

Use the venue directions on the city page and wait for the New York run sheet before fixing plans around an assumed finish time. For accessibility requirements, booking questions or team attendance,

contact team@opensummit.ai with New York and the event date.

Booked attendees can use the portal with their booking email for programme information, tickets and attendee networking. Bring a business question you want to examine with the people in the room, whether it concerns a deployment, a customer workflow or the case for investment.

Choose your New York ticket or contact us to discuss participating as a partner or community.

Quick answers

Are New York tickets available?

Yes. Our New York tickets are available for 18 February 2027 at The Town Hall, with prices in US dollars. Ticket information is current as of 22 September 2026.

What is the New York runtime?

We haven't announced our New York doors time, individual sessions, finish time or total runtime yet. We'll share those details as our programme develops.

Do Australian guest promotions apply?

Our Australian guest promotions are specific to those cities. Check your New York ticket package and checkout for the inclusions and conditions that apply to your booking.

How do booked attendees access the portal?

Sign in to our portal at <https://portal.opensummit.ai/> with your booking email for programme information, tickets and attendee connections.
